KATA PENGANTAR

Penerbitan Statistik Perdagangan Malaysia mengikut Negeri membentangkan statistik Perdagangan Antarabangsa Malaysia (barangan) berkaitan eksport dan import di peringkat negeri dengan seluruh dunia dari tahun 2018 hingga 2023. Di samping itu, penerbitan ini juga menyediakan statistik terperinci bagi setiap negeri mengikut komoditi utama / terpilih, negara asal dan destinasi bagi tahun 2021 hingga 2023.

Penerbitan ini bertujuan untuk menyediakan statistik terperinci di peringkat negeri kepada pihak *stakeholders*. Statistik komprehensif ini dihasilkan dari modul *Trade Enterprise Characteristics* (TEC), iaitu salah satu inisiatif Jabatan di bawah *Statistics Big Data Analytics* (STATSBDA). TEC mengintegrasikan dua domain statistik yang berbeza iaitu pangkalan data perdagangan barangan antarabangsa dan *Malaysia Statistical Business Register* (MSBR). Statistik ini memberikan maklumat penting kepada penggubal dasar untuk merangka perancangan strategik bagi negeri-negeri yang terlibat dalam perdagangan antarabangsa.

Ringkasan penemuan dibentangkan di bahagian pertama penerbitan ini. Bahagian kedua dibahagikan kepada enam belas seksyen, di mana setiap seksyen membentangkan statistik perdagangan terperinci untuk Malaysia termasuk tiga belas negeri dan dua Wilayah Persekutuan di Malaysia. Aspek teknikal seperti objektif statistik, skop & liputan dan konsep & definisi disediakan di bahagian terakhir untuk memudahkan pengguna memahami statistik yang diterbitkan.

Jabatan Perangkaan Malaysia merakamkan setinggi-tinggi penghargaan kepada semua pihak yang telah menyumbang secara langsung atau tidak langsung dalam merealisasikan penerbitan ini. Setiap maklum balas dan cadangan ke arah penambahbaikan penerbitan ini pada masa hadapan amat dihargai.

PREFACE

Malaysia External Trade Statistics by State contains statistics of Malaysia's External Trade (merchandise) on imports and exports at the state level with the rest of the world from 2018 to 2023. In addition, this publication provides detailed statistics for each state according to major / selected commodities, country of origin and destination from 2021 to 2023.

This publication aims to provide detailed statistics at the state level to the stakeholders. These comprehensive statistics are generated from the Trade Enterprise Characteristics (TEC) module which is one of the Department's initiatives under the Statistics Big Data Analytics (STATSBDA). TEC integrates two different statistics domains: the international merchandise trade database and Malaysia Statistical Business Register (MSBR). These statistics provide imperative information to policymakers to formulate strategic planning for states involved in international trade.

Summary of findings is highlighted in the first section of this publication. The second part is divided into sixteen sections, whereby each section presents detailed trade statistics for Malaysia including thirteen states and two Wilayah Persekutuan in Malaysia. Technical aspects such as the objective of the statistics, scope & coverage and concept & definitions are provided in the last section to facilitate users understanding of the statistics.

The Department of Statistics Malaysia acknowledges the cooperation of all parties that contributed to the success of this publication. Any feedback and suggestions towards improving the future publication is highly appreciated.

Pendahuluan

Landskap ekonomi Malaysia meliputi gabungan pelbagai aktiviti perdagangan dengan setiap negeri mempunyai kepelbagaian dan corak perdagangan masing-masing yang unik. Pada tahun 2023, sumbangan eksport dan import Malaysia kepada ekonomi masing-masing adalah 66.1 peratus dan 61.7 peratus, di mana eksport bersih adalah 4.4 peratus (Jabatan Perangkaan Malaysia, 2024). Selanjutnya, artikel ini bertujuan untuk membincangkan samada perdagangan antarabangsa Malaysia berfokus kepada perdagangan sehalah atau perdagangan dua hala.

Definisi Eurostat bagi perdagangan sehalah adalah sesebuah perusahaan yang terlibat dengan eksport sahaja atau import sahaja, manakala perdagangan dua hala didefinisikan sebagai sesebuah perusahaan yang terlibat dengan kedua-dua hala. Perdagangan sehalah atau unilateral melibatkan perniagaan yang dijalankan antara dua pihak berlainan negara yang mengkhusus sama ada sebagai pengeksport atau pengimport, sementara perdagangan dua hala secara serentak mengendalikan kedua-dua aktiviti eksport dan import antara dua negara, membolehkan aliran barangan dan perkhidmatan yang lebih seimbang. Memahami interaksi antara kategori ini adalah penting untuk memahami kompleksiti dinamik perdagangan Malaysia dan bagaimana ia memberi kesan dalam konteks ekonomi yang lebih luas.

Landskap ekonomi Malaysia dicorakkan oleh profil ekonomi yang unik di antara negeri-negeri yang berbeza. Negeri seperti Pulau Pinang, Selangor dan Johor merupakan negeri yang teratas dalam senarai negeri-negeri yang mencatatkan perkembangan terbaik dalam perdagangan antarabangsa Malaysia. Perdagangan sehalah di negeri-negeri ini tertumpu kepada pengeksportan barangan perkilangan, terutamanya elektronik dan produk pertanian dengan memanfaatkan industri khusus mereka. Eksport ini penting untuk menarik pertukaran wang asing dan menggalakkan pertumbuhan ekonomi.

Sebaliknya, perdagangan dua hala di Malaysia terlibat dalam amalan perdagangan yang lebih pelbagai. Perdagangan dua hala di negeri Pulau Pinang, Selangor dan Johor mengimport barangan keperluan seperti mesin, bahan kimia dan produk pengguna untuk memenuhi permintaan domestik di samping mengeksport komoditi tempatan secara serentak. Perdagangan dua hala ini memastikan keseimbangan pertukaran antara ekonomi dan mengurangkan risiko kebergantungan pada satu arah perdagangan tunggal sahaja.

Peniaga perdagangan sehalu yang mengkhusus terutamanya dalam eksport atau import memainkan peranan penting dalam ekosistem perdagangan Malaysia khususnya di negeri seperti Pulau Pinang, Selangor dan Johor. Negeri-negeri ini memanfaatkan industri khusus mereka seperti pembuatan terutamanya elektronik dan pertanian untuk menjana eksport yang penting untuk pertumbuhan ekonomi negara.

Sebaliknya, peniaga perdagangan dua hala terlibat dalam amalan perdagangan yang lebih seimbang memandangkan pada masa yang sama peniaga mengimport barangan keperluan untuk memenuhi permintaan domestik di samping mengeksport komoditi tempatan. Perdagangan dua hala ini memastikan pertukaran antara ekonomi yang lebih pelbagai dan mengurangkan risiko kebergantungan pada satu arah perdagangan tunggal sahaja.

Introduction

Malaysia's economic landscape is a mixture of diversified trading activities, each state contributing its unique patterns to the national trade. In 2023, the contribution of Malaysia's exports and imports to the economy were 66.1 per cent and 61.7 per cent respectively, whereby net exports were 4.4 per cent (Department of Statistics, Malaysia, 2024). Furthermore, this article aims to discuss whether Malaysia's international trade is focused on one-way traders or two-way traders.

Eurostat's definition of one-way traders is whether an enterprise involved in exports only or imports only, while two-way traders is defined as an enterprise which involved in both flows. One-way or unilateral trade involves business conducted between two different countries specializing either as exporters or importers, while two-way traders simultaneously manages both export and import between two countries. Understanding the interaction between these categories is crucial for comprehending the complexities of Malaysia's trade dynamics and how it impact the wider economic context.

The economic landscape of Malaysia consists of unique economic profiles among the different states. States such as Pulau Pinang, Selangor and Johor are among the top states that influence the performance of Malaysia's international trade. One-way traders in these regions often focus on exporting manufactured goods, especially electronics and agricultural products capitalising on their specialised industries. These exports are crucial for attracting foreign exchange and fostering economic growth.

Conversely, two-way traders in Malaysia engage in a more diversified trade practice. Two-way traders in the states of Pulau Pinang, Selangor and Johor import essential goods such as machinery, chemicals, and consumer products to meet domestic demands while simultaneously exporting local commodities. This mutual trade ensures a balanced economic exchange and mitigates the risks associated with over-reliance on a single trade direction.

Johor's Trade Trends in 2023: Decreased in total trade, exports and imports

Johor's total trade experienced a 7.5 per cent decline to RM561.6 billion in 2023 as compared to RM607.4 billion in 2022, which accounted for 21.3 per cent of Malaysia's total trade. Johor's exports decreased by 9.9 per cent to RM290.0 billion, with one-way traders falling by 35.0 per cent to RM10.3 billion, and two-way traders declining by 8.6 per cent to RM279.8 billion.

Johor's imports also experienced a 4.9 per cent decrease totalling RM271.5 billion in 2023 compared to RM285.4 billion in the previous year. Imports from one-way traders declined by 10.7 per cent year-on-year to RM11.2 billion, while imports from two-way traders declined by 4.6 per cent to RM260.3 billion.

Conclusion

In conclusion, Malaysia's international trade performance were mainly contributed by two-way trade and supported by one-way trade as well. Malaysia's economic dynamics are essentially shaped by the complex interactions between different trading activities that occur throughout its states, each of which adds unique patterns to the country's trade environment. By distinguishing between one-way and two-way traders, this analysis clarifies Malaysia's external trade and provides insights into the complex interactions that underlie the country's trade dynamics.

One-way traders specialising predominantly in either exports or imports play a significant role in Malaysia's trade ecosystem particularly in states such as Pulau Pinang, Selangor and Johor. These states harness their specialized industries such as manufacturing especially electric and electronics and agriculture to fuel exports which is crucial for the country's economic growth. Conversely, two-way traders engage in a more balanced trade practice simultaneously importing essential goods to meet domestic demand while exporting local commodities. This mutual trade fosters a more diversified economic exchange and mitigating risks associated with over-reliance on a single trade direction.

NOTA TEKNIKAL

1. PENGENALAN

Penerbitan ini mengandungi statistik Perdagangan Luar Negeri Malaysia (barangan) berkaitan import dan eksport di peringkat negeri dengan seluruh dunia. Di samping itu, penerbitan ini menyediakan statistik terperinci bagi setiap negeri mengikut komoditi utama/ terpilih dan negara asal dan destinasi. Bahagian pertama penerbitan ini membentangkan ringkasan penemuan. Bahagian kedua penerbitan ini diperincikan kepada lima belas seksyen di mana setiap seksyen membentangkan statistik perdagangan terperinci untuk tiga belas negeri dan dua Wilayah Persekutuan di Malaysia.

2. OBJEKTIF

Statistik Perdagangan Malaysia mengikut Negeri pertama kali diterbitkan bagi tahun 2020, bertujuan untuk menyediakan statistik terperinci di peringkat negeri kepada pihak *stakeholders*. Statistik komprehensif ini dihasilkan daripada modul *Trade Enterprise Characteristics* (TEC), iaitu salah satu inisiatif Jabatan di bawah *Statistics Big Data Analytics* (STASBDA) dengan menerapkan penggunaan analisis *Big Data*. TEC mengintegrasikan dua domain statistik yang berbeza iaitu pangkalan data perdagangan barangan antarabangsa dan *Malaysia Statistical Business Register* (MSBR). Inisiatif ini telah memberikan nilai tambah kepada statistik perdagangan antarabangsa yang sedia ada tanpa perlu melaksanakan survei baru.

Melalui TEC, statistik perdagangan antarabangsa yang lebih komprehensif mengikut negeri dapat disediakan bagi kemudahan pembuat dasar, penganalisis perdagangan antarabangsa dan penyelidik. Statistik ini amat penting kerana boleh menangani soalan dasar tentang negeri yang terlibat dalam perdagangan antarabangsa dan menguasai eksport Malaysia. Oleh itu, sebarang dasar atau insentif yang relevan dapat dirumus untuk mempromosikan aktiviti eksport.

3. SKOP DAN LIPUTAN

3.1 Aliran Perdagangan Negeri

Eksport diperuntukkan kepada negeri berdasarkan negeri asal (iaitu negeri dalam Malaysia di mana peringkat akhir pengeluaran atau pembuatan berlaku). Sebaliknya, import diperuntukkan kepada negeri berdasarkan negeri destinasi terakhir (iaitu negeri di mana barangan dikeluarkan daripada kawalan pihak Jabatan Kastam Diraja Malaysia, tetapi tidak semestinya di mana barangan itu akhirnya dijual atau digunakan).

Ketepatan dalam pelaporan negeri asal dan negeri destinasi akhir dalam dokumentasi oleh pihak Jabatan Kastam Diraja Malaysia memberi kesan kepada kualiti statistik perdagangan barangan mengikut negeri. Dalam hal ini, Negeri pemuatan/ pelepasan akan digunakan sebagai proksi bagi negeri asal/ destinasi akhir yang sebenar.

3.2 Eksport dan Import di Kawasan Supra dan Wilayah Persekutuan

Aktiviti eksport dan import yang berlaku di kawasan Supra (merangkumi aktiviti pengeluaran yang melangkaui pusat kepentingan ekonomi utama bagi mana-mana negeri) atau periklanan yang dilakukan oleh ejen penghantar tidak termasuk.

Nilai import atau eksport bagi W.P. Kuala Lumpur adalah termasuk W.P. Putrajaya.

4. SUMBER DATA

4.1 Data Perdagangan Barangan Antarabangsa

- a. Pengiklanan import dan eksport yang diluluskan oleh Jabatan Kastam Diraja Malaysia (JKDM) dan Pihak Berkuasa Zon Bebas.
- b. Keterangan mengenai pengiraman bungkusan pos/ *courier* yang dibekalkan oleh JKDM, Pos Malaysia Berhad dan Keretapi Tanah Melayu Berhad (KTMB).
- c. Penyata dan pengiklanan eksport mengenai *bunkers* dan *stores* yang dibekalkan kepada kapal laut dan kapal terbang yang dikeluarkan/ diluluskan oleh JKDM, Penerbangan Malaysia Berhad (MAB) dan syarikat-syarikat petroleum.
- d. Penyata penjualan barangan yang dibekalkan oleh pengusaha-pengusaha kedai bebas cukai.
- e. Penyata jualan dan belian elektrik yang dikeluarkan oleh syarikat pengeluar tenaga.

4.2 Malaysia Statistical Business Register (MSBR)

Senarai syarikat perniagaan yang mana ia merupakan satu daftar lengkap perniagaan dan syarikat yang beroperasi di Malaysia. MSBR merangkumi semua senarai pertubuhan yang berdaftar berdasarkan pendaftaran syarikat (ROC), pendaftaran perniagaan (ROB) dan *Limited Liability Partnership* (LLP) yang berdaftar dengan Suruhanjaya Syarikat Malaysia (SSM) serta pertubuhan yang berdaftar dengan Pihak Berkuasa Tempatan dan badan-badan professional.

5. KONSEP DAN DEFINISI

5.1 Konsep dan definisi

Konsep dan definisi yang diguna pakai untuk menyusun perangkaan ini berdasarkan *International Merchandise Trade Statistics: Concepts and Definitions* 2010 (IMTS 2010) yang dikeluarkan oleh Pertubuhan Bangsa-Bangsa Bersatu.

5.2 Import

Sesuatu barang dianggap sebagai import apabila ianya dibawa masuk ke dalam negara, sama ada terus ataupun disimpan di gudang-gudang yang dikawal tanpa mengira sama ada barang tersebut adalah untuk kegunaan sendiri, diproses, digunakan dalam perkilangan ataupun untuk dieksport semula ke negara lain.

5.3 Eksport

Sesuatu barang (keluaran atau buatan tempatan atau diimport untuk dieksport semula) dianggap sebagai eksport apabila ianya dibawa keluar dari negara.

6. ASAS PENILAIAN

6.1 Import

Import dinilai mengikut c.i.f. (*cost, insurance and freight* - kos, insuran dan tambang), iaitu nilai barangan di pasaran di sempadan perangkaan/ kastam negara pengimport termasuk semua perbelanjaan insuran dan tambang semasa dalam perjalanan tetapi kos pemunggaan dari alat pengangkutan tidak diambil kira kecuali kos tersebut ditanggung sendiri oleh pengangkut.

6.2 Eksport

Eksport dinilai mengikut f.o.b. (*free on board*) iaitu nilai barangan di pasaran di sempadan perangkaan/ kastam negara pengeksport termasuk semua perbelanjaan pengangkutan ke sempadan tersebut, duti eksport dan duti lain yang perlu dibayar serta kos untuk memunggah barang ke atas alat pengangkutan kecuali kos terakhir itu ditanggung sendiri oleh pengangkut.

7. KLASIFIKASI BARANG DAGANGAN

Pengelasan eksport dan import adalah mengikut *Standard International Trade Classification* (SITC), Rev. 4.

8. NEGARA ASAL DAN DESTINASI

8.1 Import

Import dikelaskan mengikut negara asal barangan, iaitu negara di mana barangan itu dibentuk dengan lengkap seperti mana ianya diimport masuk ke dalam negara.

8.2 Eksport

Eksport dikelaskan mengikut negara yang dituju iaitu negara di mana barangan itu dijangka akan digunakan; berdasarkan sejauh mana maklumat ini dapat ditentukan pada masa ianya dieksport.

9. KEPERLUAN KERAHSIAAN

Data perdagangan telah disusun di bawah peruntukan **Akta Perangkaan 1965 (Disemak-1989)**. Akta ini mensyaratkan bahawa kandungan penyata individu adalah **sulit**. Selaras dengan peruntukan tersebut, hanya angka agregat diterbitkan.

10. MAKLUMAT LANJUT

Untuk maklumat lanjut berkenaan dengan definisi, pengelasan dan isu berkaitan kerahsiaan maklumat yang digunakan oleh DOSM dalam kompilasi statistik ini, sila rujuk kepada laman web DOSM di bawah tema – Sektor Luaran.

TECHNICAL NOTES

1. INTRODUCTION

This publication contains statistics of Malaysia's External Trade (merchandise) on imports and exports at the state level with the rest of the world. In addition, this publication provides detailed statistics for each state according to major and selected commodities and country of origin and destination. The first part of this publication highlights the summary of findings. The second part is divided into fifteen sections, whereby each section presents detailed trade statistics for thirteen states and two Wilayah Persekutuan in Malaysia.

2. OBJECTIVE

Malaysia External Trade Statistics by State is first initiated in 2020, aiming to provide detailed statistics at the state level to the stakeholders. These comprehensive statistics are generated from the Trade Enterprise Characteristics (TEC) module. TEC is one of the department's initiatives under the Statistics Big Data Analytics (STASBDA) in embracing Big Data Analytics. TEC integrates two different statistics domains: the international merchandise trade database and Malaysia Statistical Business Register (MSBR). This initiative provides value added to an existing international trade statistics without initiating a new survey.

More comprehensive international trade statistics can be provided through TEC to policy makers, international trade analysts, and researchers. These statistics are important as they can address the fundamental questions of which states involved in international trade and dominate Malaysia's exports. Therefore, any relevant policies or incentives can be formulated to promote exports activities.

3. SCOPE AND COVERAGE

3.1 State Trade Flow

Exports are allocated to the state based on the state of origin (i.e. state of Malaysia where the final stage of production or manufacturing occurs). On the other hand, imports are earmarked for the state based on the state of final destination (i.e. the state of Malaysia in which goods are released from Customs controls, but not necessarily where they are ultimately sold or consumed).

The accuracy in reporting the actual State of origin and State of final destination on Royal Malaysian Customs Department documentation affects the quality of State merchandise trade statistics. In this case, the state of loading/discharge may be used as a proxy for the actual state of origin/final destination.

3.2 Exports and Imports in the Supra Area and Wilayah Persekutuan

Exports and imports activities that are taking place in the Supra area (including production activities beyond the centre of predominant economic interest for any state) or declarations made by the agent are not included.

Imports or exports value for W.P. Kuala Lumpur includes W.P. Putrajaya.

4. SOURCE OF DATA

4.1 International merchandise trade data:

- a. Imports and exports declarations approved by the Royal Malaysian Customs Department (RMCD) and Free Zone Authorities.
- b. Particulars on postal/courier packages are provided by the RMCD, Pos Malaysia Berhad and Keretapi Tanah Melayu Berhad (KTMB).
- c. Statements and exports declarations on bunkers and stores supplied to ships and aircraft issued/approved by the RMCD, Malaysia Airlines Berhad (MAB) and petroleum companies.
- d. Statements on goods sold are supplied by the operators of duty-free shops.
- e. Statements on the sale and purchase of electricity issued by 'power producer company'.

4.2 Malaysia Statistical Business Register (MSBR)

Malaysia Statistical Business Register (MSBR) is a list of establishments or enterprises operating in Malaysia. These establishments or enterprises encompass Register of Companies (ROC), Register of Businesses (ROB) and Limited Liability Partnership (LLP) that registered with Companies Commission Malaysia (CCM) as well as establishment that is registered with the local authority and professional bodies.

5. CONCEPTS AND DEFINITIONS

5.1 Concepts and Definitions

Concepts and definitions used to compile these statistics are based on International Merchandise Trade Statistics: Concepts and Definitions 2010 (IMTS 2010) published by the United Nations, New York.

5.2 Imports

Goods are regarded as imports when they are brought into the country either directly or into bonded warehouses, irrespective of whether such goods are for consumption, to be processed, used in manufacturing or subsequent re-exports to other countries.

5.3 Exports

Goods (locally produced or manufactured or imported for subsequent re-exports) are regarded as exports when taken out of the country.

6. BASIS OF VALUATION

6.1 Imports

Imports are valued on a c.i.f. (cost, insurance and freight) basis, that is, the value of the goods in the market at the statistical/customs frontier of the importing country, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the carrier unless it is borne by the carrier.

6.2 Exports

Exports are valued on a f.o.b. (free on board) basis, that is, the value of the goods in the market at the statistical/customs frontier of the exporting country, including all costs of transporting the goods to the statistical/customs frontier, exports and other duties payable as well as the cost of loading the goods onto the carrier unless the latter cost is borne by the carrier.

7. CLASSIFICATION OF COMMODITIES

The classification of exports and imports is according to the Standard International Trade Classification (SITC), Rev. 4.

8. COUNTRY OF ORIGIN AND DESTINATION

8.1 Imports

Imports are classified according to the country of origin of the goods, that is the country where the goods are given the final form in which they are imported into the country.

8.2 Exports

Exports are classified according to the country of destination, that is the country where it is expected that the goods will be consumed insofar as this can be ascertained at the time of exports.

9. CONFIDENTIALITY REQUIREMENTS

*The trade data have been compiled under the provisions of the **Statistics Act 1965 (Revised-1989)**. The Act stipulates that the contents of individual returns are **confidential**. In conformity with the said stipulation, only aggregated figures are published.*
